

Combined Agent

Combined agents gather multiple effects in a single product simplifying the handling process at the pumping station.

These additives guarantee an efficient and homogenous resin penetration into the paper, an excellent release from any kind of press plates and prevent the formation of resin build-up on the press plates.

NAME	DOSAGE	PROPERTIES				BENEFIT
		Wetting	Release	Anti-dust	Hardener	
HIPE®ADD WR21	0,4% - 0,8%	✓	✓			■ Well balanced combined agent
