

Paintability Enhancer

HIPE®ADD SL30 is an efficient paintability enhancer to get perfect paintable surfaces for production of particle boards and fiber boards.

Closing the microholes of particle and fiber boards, it allows a save in the needed amount of paint.

Used alone or mixed with release agent, HIPE®ADD SL30 can be sprayed before entering the press to guarantee a perfect closing of the board surface.

NAME	DILUTION	DOSAGE	BENEFIT
HIPE®ADD SL30	10-15%	20-40 mL/m2	<ul style="list-style-type: none">■ Perfect closed surface■ Fully compatible with release agents
